JOURNAL OF PATHOLOGY, VOLUME 122

INDEX OF SUBJECTS

PAGE

ANTIMACROPHAGE SERUM used in the study of mechanism of fusion of hamster macrophages 163
ARGYROPHIL CELLS studied in the lungs of rabbits living under hypoxic conditions at high altitude 137
ARTHUS REACTION, value of multifactorial screening for anti-inflammatory activity as shown by coumarin . . 201

BARKER SYNDROME (neonatal respiratory distress) in the pig, ultrastructural pathology of the lung 145
BLADDER, identification and significance of early stromal invasion in papillary carcinomas 91
BONE, arthritic articular cartilage lesions of the femoral head observed in the scanning electron microscope . . 63
ultrastructure of skeletal haemangiosarcomas induced in mice by strontium-90 209
BOOKS RECEIVED 53

CARCINOMA, papillary, of the urinary bladder, identification and significance of early stromal invasion . . . 91
CARTILAGE osteoarthritic articular lesions of the femoral head observed in the scanning electron microscope . . 63
CHROMOPHOBE ADENOMA of the human pituitary gland, an ultrastructural study 219
COBALT, transformation in the presence of metals of lymphocytes from patients with total joint prostheses . . 35
COLLAGEN, osteoarthritic articular cartilage lesions of the femoral head observed in the scanning electron microscope . 63
COLON, morphological study of abnormalities of the local immune system in intestinal neoplasia . . 55
COUMARIN, value of multifactorial screening for anti-inflammatory activity . 201
CRUSADES, bodies preserved in St Micham's Church, Dublin 27

DOG, ultrastructural study of atypical glycogen deposits in a plasmacytoma 157
DUBLIN, bodies preserved from the days of the crusades in St Micham's Church 27

PAGE

ELECTRICAL EXCITABILITY of oat cell carcinoma 153
ELECTRON MICROSCOPE STUDY, atypical glycogen deposits in a plasmacytoma 157
chromophobe adenoma of the human pituitary gland 219
fine structure of human macrophage granules in sarcoidosis . . . 29
intestinal and diffuse type gastric carcinoma 129
mechanism of fusion of hamster macrophages induced by antimacrophage serum 163
neoplastic macrophages grown from human leukaemic monocytes . . 13
pathology of the lung in Barker (neonatal respiratory distress) syndrome in the pig 145
porcine hereditary lymphoma with some observations on cell cultures and enzyme cytochemistry . . . 191
skeletal haemangiosarcomas induced in mice by strontium-90 . . . 209
ELECTRON MICROSCOPY, SCANNING, osteoarthritic articular cartilage lesions of the femoral head 63
EMBOLI, organic fragmentation in pulmonary arteries 95
ENDOCYTOSIS, fusion of macrophages following simultaneous attempted phagocytosis of glutaraldehyde-fixed red cells 71
ERYTHROCYTES, fusion of macrophages . 71
ERYTHROPHAGOCYTOSIS, Ig surface receptors and erythrophagocytic activity of histiocytosis X cells *in vitro* . . 105
malignant histiocytosis with associated "reticulum celled sarcoma" . . 9

FEMUR, osteoarthritic articular cartilage lesions observed in the scanning electron microscope 63

GIANT CELLS, failure of altered macrophage surface to lead to the formation of polykaryons 185
fusion of macrophages following simultaneous attempted phagocytosis of glutaraldehyde-fixed red cells . . 71
mechanism of fusion of hamster macrophages induced by antimacrophage serum 163

PAGE

GRANULOMATA, failure of altered macrophage surface to lead to the formation of polykaryons 185
fusion of macrophages following simultaneous attempted phagocytosis of glutaraldehyde-fixed red cells . . 71
GLYCOGEN deposits in a plasmacytoma . 157

HAEMANGIOSARCOMA induced in mice by strontium-90 209
HAMSTER, failure of altered macrophage surface to lead to the formation of polykaryons 185
mechanism of fusion of macrophages induced by antimacrophage serum . 163
HISTIOCYTES, malignant histiocytosis with associated "reticulum celled sarcoma" 9
HISTIOCYTOSIS, MALIGNANT, with associated "reticulum celled sarcoma" . . 9
HISTIOCYTOSIS X cells, Ig surface receptors and erythrophagocytic activity . . 105
HODGKIN'S DISEASE, rosetting and other reactions of the Reed-Sternberg cell . 81
HOMOGRAFTS in mouse skin, histological criteria for immunological rejection . 1
HYALINE MEMBRANES. ultrastructural pathology of the lung in Barker (neonatal respiratory distress) syndrome in the pig 145
HYDROXYANISOLE-induced regression of the Harding-Passey melanoma in mice . 117
HYPOPLASIA, pulmonary, in babies with severe rhesus isoimmunisation, a quantitative study 43
HYPOXIA, pulmonary argyrophil cells at high altitude 137

IMMUNITY, morphological study of abnormalities of the local immune system in intestinal neoplasia 55
IMMUNOFLUORESCENT TECHNIQUES, Ig surface receptors and erythrophagocytic activity of histiocytosis X cells *in vitro* 105
immunity in intestinal neoplasia . . 55
IMMUNOPEROXIDASE TECHNIQUE, malignant histiocytosis with associated "reticulum celled sarcoma" 9
rosetting and other reactions of the Reed-Sternberg cell 81
INFLAMMATION, value of multifactorial screening for anti-inflammatory activity as shown by coumarin . . 201
INTESTINE, morphological study of abnormalities of the local immune system in neoplasia 55
ultrastructure of intestinal and diffuse type gastric carcinoma 129
ISOIMMUNISATION, severe rhesus, a quantitative study of pulmonary hypoplasia in babies 43

LECITHIN, ultrastructural pathology of the lung in Barker (neonatal respiratory distress) syndrome in the pig . . 145
LEUCOCYTE MIGRATION, value of multifactorial screening for anti-inflammatory activity as shown by coumarin . 201
LEUKAEMIA, neoplastic macrophages grown from human monocytes . . 13
LUNG, argyrophil cells at high altitude . 137
organic fragmentation in thromboemboli 95
quantitative study of hypoplasia in babies with severe rhesus isoimmunisation 43
ultrastructural study of pathology in Barker (neonatal respiratory distress) syndrome in the pig 145
LYMPH NODES, rosetting and other reactions of the Reed-Sternberg cell . . 81
LYMPHOCYTES, morphological study of abnormalities of the local immune system in intestinal neoplasia . . 55
rosetting and other reactions of the Reed-Sternberg cell 81
transformation in the presence of metals from patients with total joint prostheses 35
LYMPHOMA, ultrastructural studies on tissues and cell cultures established from an hereditary lymphosarcoma of Large White pigs 191

MACROPHAGES, failure of altered macrophage surface to lead to the formation of polykaryons 185
fine structure of granules in human sarcoidosis 29
fusion following simultaneous attempted phagocytosis of glutaraldehyde-fixed red cells 71
mechanism of fusion in hamsters induced by antimacrophage serum . . 163
neoplastic, grown from human leukaemic monocytes 13
value of multifactorial screening for anti-inflammatory activity as shown by coumarin 201
MANDIBLE, ultrastructural study of atypical glycogen deposits in a plasmacytoma 157
MELANOMA regression in mice induced by hydroxyanisole 117
MONOCYTES obtained from untreated patients diagnosed as suffering from acute myelogneous leukaemia (AML) in the course of therapeutic leukophoresis for growth of neoplastic macrophages 13
MORPHOMETRY, pulmonary argyrophil cells at high altitude 137

PAGE

pulmonary hypoplasia in babies with severe rhesus isoimmunisation . 43
MOUSE, fusion of macrophages following simultaneous attempted phagocytosis of glutaraldehyde-fixed red cells . 71
histological criteria for immunological rejection of skin homografts . . 1
human cancer and other transplants in the " nude " mouse 225
hydroxyanisole-induced regression of the Harding-Passey melanoma . . 117
neoplastic macrophages grown from human leukaemic monocytes . . 13
ultrastructure of skeletal haemangiosarcomas induced by strontium-90 . 209
value of multifactorial screening for anti-inflammatory activity as shown by coumarin 201

NICKEL, transformation in the presence of metals of lymphocytes from patients with total joint prostheses . . 35

OAT CELL carcinoma studied electrophysiologically 153
OBITUARY, Daniel Fowler Cappell . 175
Onno Hendrik Dijkstra 115
OSTEOARTHRITIS, articular cartilage lesions of the femoral head observed in the scanning electron microscope . . 63

PERMEABILITY, value of multifactorial screening for anti-inflammatory activity as shown by coumarin . . 201
PHAGOCYTOSIS, malignant histiocytosis with associated " reticulum celled sarcoma " 9
stimulation by coumarin administration *in vivo* 201
PHOSPHOLIPID, ultrastructural study of the pathology of the lung in Barker (neonatal respiratory distress) syndrome in the pig 145
PIG, ultrastructural pathology of the lung of a naturally occurring, fatal respiratory distress syndrome of the newborn . 145
ultrastructure of hereditary lymphoma with some observations on cell cultures and enzyme cytochemistry . . 191
PLASMACYTOMA, ultrastructural study of atypical glycogen deposits . . 157
PLEURA, value of multifactorial screening for anti-inflammatory activity as shown by coumarin. 201
PROSTHESES, METAL, transformation of lymphocytes 35

RABBITS, failure of altered macrophage surface to lead to the formation of polykaryons 185

PAGE

mechanism of fusion of macrophages induced by antimacrophage serum . 163
pulmonary argyrophil cells at high altitude 137
REED-STERNBERG CELL, rosetting and other reactions 81
RESPIRATORY DISTRESS SYNDROME in the pig, ultrastructural pathology of the lung 145
RETICULOSARCOMA in association with malignant histiocytosis . . . 9
RHESUS FACTOR, quantitative study of pulmonary hypoplasia in babies . 43
ROSETTES and other reactions of the Reed-Sternberg cell 81
Ig surface receptors and erythrophagocytic activity of histiocytosis X cells *in vitro* 105

ST MICHAM'S CHURCH, Dublin, bodies preserved from the days of the crusades 27
SARCOIDOSIS, fine structure of macrophage granules. 29
SKIN, histological criteria for immunological rejection of homografts in mice 1
STOMACH, malignant histiocytosis with associated " reticulum celled sarcoma " 9
ultrastructure of intestinal and diffuse type gastric carcinoma . . . 129
STRONTIUM-90 administered to mice for ultrastructural study of skeletal haemangiosarcomas . . . 209

THROMBOSIS, histological criteria for immunological rejection of mouse skin homografts 1
organic fragmentation in pulmonary emboli obtained from 107 necropsy subjects 95
TISSUE CULTURE, electrical excitability of oat cell carcinoma 153
failure of altered macrophage surface to lead to the formation of polykaryons 185
hydroxyanisole-induced regression of the Harding-Passey melanoma in mice . 117
Ig surface receptors and erythrophagocytic activity of histiocytosis X cells *in vitro* 105
mechanism of fusion of hamster macrophages induced by antimacrophage serum 163
neoplastic macrophages grown from human leukaemic monocytes . . 13
rosetting and other reactions of the Reed-Sternberg cell 81
ultrastructure of a porcine hereditary lymphoma with some observations on cell cultures and enzyme cytochemistry 191

PAGE

TOAD, human cancer and other transplants in the "nude" mouse . . . 225
TRANSPLANTS of tissues from carcinoma of lung, large bowel, breast, melanoma and osteosarcoma grafted in "nude" mice 225
TUMOURS, ANIMAL, INDIVIDUAL, hydroxyanisole-induced regression of the Harding-Passey melanoma in mice . 117
ultrastructural study of atypical glycogen deposits in a plasmacytoma . . 157
ultrastructure of skeletal haemangiosarcomas induced in mice by strontium-90 209
TUMOURS, HUMAN, INDIVIDUAL, electrical excitability of oat cell carcinoma . 153
identification and significance of early stromal invasion in papillary carcinomas of the urinary bladder . 91
malignant histiocytosis with associated "reticulum celled sarcoma" . . 9
morphological study of abnormalities of the local immune system in intestinal neoplasia 55
neoplastic macrophages grown from leukaemic monocytes . . . 13
transplants in the "nude" mouse . 225
ultrastructure of chromophobe adenoma of the pituitary gland . . . 219
ultrastructure of intestinal and diffuse type gastric carcinoma . . . 129

XENOGRAFTS, human cancer and other transplants in the "nude" mouse . 225
